The next screen captures show how to set the dates and divisions for the meet. I use September 1, 2022 as the Age-Up Date in Meet Manager because... using the current year tends to work better, especially for the older Grade Twelve athletes. Also, I get fewer interruptions in the results area from coaches and parents and athletes when they see a report that has age and they come to inform me that Johnny/Joanne is seventeen now, not sixteen. (Statistically, the majority of the athletes have had a birthday since September 1, 2021 -- having the age-up date as September 1, 2022 allows the various reports (e.g.: that allow the announcer to note the age of the athlete) to show the age of the athlete "now" for eight-twelfths of the athletes rather than the age the athlete had more than eight months ago.)

How this helps make things work better in Team Manager for your coaches... Here are the steps your coach can perform in **Team Manager**:

- Use pulldown menu Set-up, Age Divisions to change the Junior, Intermediate, and Senior "low age" and "high age" calculations to be "Day 1 of Meet". Do the same thing for Open and Open Intellectual. Close the window.
- Use pulldown menu Meets, double-click the meet, then change the meet's Start Date **and** End Date to be the same as the Age-up Date (i.e.: September 1, 2022). (Yes, September 1, 2022. Really: 2022....)

After making these changes, the "Entries by Name" should behave a bit better. However... As noted in the Team Manager Quickstart Guide (<http://www.ellistiming.ca/MetroTrack/>), "Entry by Event" is more reliable than "Entries by Name" ....

There is a (long-time, **still** not fixed) bug in the Team Manager software on the "Entries by Name" window: If the age of the athlete satisfies more than one age group (e.g.: Senior defined as 18-19, Open defined as 14-19), it only shows the events for one of the age groups rather than **all** of the ones matching the athlete's age.

If your coach will **not** be entering any athletes in the Open events nor in the Open Intellectual events, one way of solving the problem is... In **Team Manager**... Use pulldown menu Set-up, Age Divisions and delete the "Open" and "Open Intellectual" lines. Close the window, then return to the "Entries by Name" function.

In order to achieve these settings in Meet Manager for the birthdate ranges, the trick is... *temporarily* change the meet date to be September 1, 2022. Then update the division ranges. Then return to the meet set-up date to change the meet date back to the actual date of competition (but leaving the age-up date as September 1, 2022).
